ACADEMIC PROJECTS

Mobile E-commerce

Frontend : HTML, CSS, Bootstrap, JavaScript

Backend : PHP

Database : MySQL

Description :

- This project is a Mobile E-commerce web application that allows users to browse and purchase electronic products like wireless headphones, handsfree, and Bluetooth devices.
- It is designed as a CRUD (Create, Read, Update, Delete) application, where the admin can manage product listings, update details, and remove outdated items.
- The platform provides a user-friendly interface built with HTML, CSS, Bootstrap, and JavaScript for smooth navigation and responsive design.
- On the backend, PHP handles the server-side logic, while MySQL is used for storing product information, user details, and transaction records.
